MUHAMMAD FARRIS HIRZAN
WEB DEVELOPER

5, Jalan Desa Bestari 22, Desa Bestari 43900 Sepang, Selangor | farris.job@gmail.com | LinkedIn | Portfolio

EDUCATION

Bachelor's Degree in Information Technology with Honours   **Mar 2022 - Present**
Universiti Tun Hussein Onn Malaysia (Parit Raja, Johor)
- Led team collaboration to successfully organize and host Color Run event for UTHM students.

Diploma in Information Technology   **Jul 2018 - Nov 2020**
Multimedia University (Cyberjaya, Selangor)
- Collaborated with team members to organize and host an inspiring motivational talk featuring Mr. Kuan Chee Heng at MMU.

UNIVERSITY PROJECTS

UTHMAssist Online Job Portal   **Jun 2024**
Degree Final Year Project, Universiti Tun Hussein Onn Malaysia
- Developed UTHMAssist, an online job portal made specifically for UTHM students to generate side incomes using TALL tech stacks, Pusher and MySQL.
- Designed and programmed the system from the ground up, following the full SDLC process, including requirement analysis, database design (ERD), UI/UX design, development, testing and deployment.
- Implemented real-time broadcasting features, such as instant notifications and messaging to enhance user engagement.

Sit2Order Food Ordering System   **May 2021**
Diploma Final Year Project, Multimedia University
- Built Sit2Order, a robust food ordering system using Laravel, Bootstrap and MySQL to enhance restaurant operations and improve customer experience.
- Assigned as a backend developer within a team of three, focusing on designing database (ERD), database management, troubleshooting and debugging.
- Established Git for version control and seamless team collaboration, ensuring efficient development, code management and conflict resolution.

PROFESSIONAL EXPERIENCE

Junior Software Developer, RISAU IO Sdn Bhd   **May 2021 - Sep 2021**
- Developed POS system for Malakat using Flutter to deliver efficient and scalable solutions.
- Created robust reusable code and functions to ensure optimized future development processes.
- Worked with UI/UX designers to implement intuitive and user-focused interfaces using Figma.
- Collaborated closely with developers to align with project goals and requirements.

RPA Business Analyst/ Developer Intern, Telekom Malaysia Berhad   **Mar 2020 - Jun 2020**
- Completed RPA and Automation courses provided by UIPath during internship period and received certificates.
- Designed and implemented efficient Robotic Process Automation workflows for emailing services using UIPath to streamline operations.
- Actively participated in team meetings and fostered collaborations to achieve project objectives.
